**INTERVIEW SUMMARY**

**Mail Stop Amendment**

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

Dear Sir:

The attached interview summary reflects the substance of the personal interview held between Examiner Lankford and the undersigned on September 13, 2006.

Appl. No. : 10/614,392  
Filed : July 7, 2003

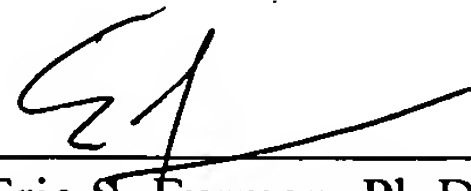

### SUMMARY OF INTERVIEW

Applicants wish to thank Examiner Lankford for the courtesy extended during the personal interview held on September 13, 2006 and the helpful comments made therein. During the interview between the undersigned and Examiner Lankford, the indefiniteness rejections 35 U.S.C. § 112, second paragraph, the utility rejections raised under 35 U.S.C. §§ 101, and the enablement rejections raised under 35 U.S.C. § 112, first paragraph, raised in the Office Action mailed March 30, 2006 were discussed. The undersigned and the Examiner also discussed proposed claim amendments. The undersigned and the Examiner also discussed proposed claim amendments. The undersigned and the Examiner agreed that a proposed claim directed to a method of processing a cell population that comprises adipose stem cells for reintroduction into a patient, comprising removing adipose tissue that comprises adipose stem cells from said patient; introducing the removed adipose tissue into a self-contained cell processing unit configured to maintain a closed pathway; separating said cell population that comprises said adipose stem cells from non-adipose tissue present in the tissue that was removed from said patient within said self-contained cell processing unit while maintaining said closed pathway; concentrating said cell population that comprises adipose stem cells with said self-contained cell processing unit while maintaining said closed pathway; cooling said cell population that comprises said concentrated adipose stem cells within said self-contained processing unit; and reintroducing said concentrated cell population that comprises concentrated adipose stem cells from said self-contained cell processing unit into said patient, would likely overcome the rejections of record.

Respectfully submitted,

KNOBBE, MARTENS, OLSON & BEAR, LLP
